

# Results of comparative study on similarities and differences between different CTDs

*DCVMN Common Technical Document (CTD) Workshop*

*Brazil, 18 to 20 June 2018*

*Dr. Nora Dellepiane*

**This work has been produced by the Developing Countries Vaccine Manufacturers Network (DCVMN) in collaboration with the International Federation of Pharmaceutical Manufacturers and Associations (IFPMA) based on data available in the participating companies.**

***With funding from the Bill and Melinda Gates Foundation (BMGF)***

# Recommendations from Annual DCVMN meeting 2016 and related Regulatory Panel

□ Outcome of the regulatory panel: There is a need for **hard data** to back up the description of constraints faced for registration of vaccines in developing countries

- Comparative analysis of CTDs from different countries to assess similarities and differences in requirements (contents and numbering)

- Engagement of IFPMA member companies to work jointly with DCVMN member companies on constraints and proposals for improvements
- Workshop in Geneva to collect “hard data” on constraints

# Workshop in Geneva.

May 15 and 16 2017

**Participants:** Mary Allin (Pfizer), Abdulaziz M.M Almotiri (Arabio), Paula Barbosa (IFPMA), Nirav Amitkumar Chokshi (Zydus Cadila), Monique Collaço de Moraes Stávale (Bio-Manguinhos), Samir Desai (Zydus Cadila), Shubhangi Ghadge (Serum Institute of India), Tarek Ibrahim (Arabio), Seon Gyeong Jeong (LG Chem). Matthew Marsden (Pfizer), Mic McGoldrick (Merck ), YIJIE Qu (CNBG), Christophe Saille ( former GSK), Mira Uton (Biofarma) and Qiaoruo Xiong (CNBG)

**Facilitator:** Nora Dellepiane (Consultant DCVMN)

## **Outputs of the workshop:**

1. Review accuracy and inputs to the comparative analysis of CTDs, finalization of CTD comparative analysis
2. Comparison of application forms of different countries
3. Comparison of registration process and country specific requirements in 134 countries

# Approach

## Module I comparison

- ✓ Module 1: CTDs of Australia, China, Europe, the Gulf Cooperation Council (GCC) India, Jordan, PAHO, Tanzania, Thailand, the United States (US) and the (World Health Organization (WHO) are compared to each other, up to node 3 (level 3 of detail).
- ✓ The raw data were organized by aligning the topics on the basis of similarity of content independently of the number assigned to them in each CTD.
- ✓ Similarities and differences between each other were assessed for content and also for the numbering sequences used
- ✓ Contents expressed exactly in the same terms or slightly differently but requiring the same information were considered similar; and contents that differed between the CTDs were considered different
- ✓ For simplicity, the items referring to the application forms were left out of the exercise

# Approach

## Modules 2-5 comparison

- ✓ Modules 2-5: CTDs from PAHO, India, Jordan FDA and Thai FDA are compared to the ICH CTD as implemented by US FDA.
- ✓ The raw data table was constructed by aligning the topics on the basis of similarity of content independently of the number assigned to them in each CTD.
- ✓ Similarities and differences in relation to ICH CTD were assessed for content and also for the numbering sequences used

# Approach

## Modules 2-5 comparison

**CTDs from different countries were considered “different” from the ICH CTD if one of the following situations applied:**

- Country X did not require a specific item required in the ICH CTD)
- Country X required data/information not required in the ICH CTD (other information)
- Country X contained in its requirements the same heading (or similar) as contained in the ICH CTD but the data/information expected to be provided under such heading was not specified, while being specified in the ICH CTD
- Country X contained in its requirements the same heading (or similar) as contained in the ICH CTD but the data/information expected to be provided under such heading was specified, while not being specified in the ICH CTD
- Country X requires different information from ICH under the same heading

# Calculations of % of similarity and difference

## MODULE 1

- ✓ % of similarity =  $\frac{\text{N}^\circ \text{ items with similar content or numbering}}{\text{N}^\circ \text{ items compared}} \times 100$
- ✓ % of difference = 100 - % of similarity

## MODULE 2-5

- ✓ % of similarity =  $\frac{\text{N}^\circ \text{ items with similar content or numbering to ICH (CTD)}}{\text{N}^\circ \text{ items compared}} \times 100$
- ✓ % of difference = 100 - % of similarity

# CTD CONTENTS

# CTD CONTENTS MODULES 2-5

ASEAN, INDIA, JORDAN, PAHO AND  
THAILAND Vs. ICH (FDA)

# Comparison between ASEAN and ICH

- The structure of the ASEAN CTD is completely different from the ICH CTD.
- Information required in Module 2 of the ICH CTD is embedded in the other sections in the ASEAN CTD
- Due to these structural differences
  - ASEAN is not included in the tables as for the other countries/regions because the comparison between the ICH and the ASEAN CTDs was done separately from that done for other countries
  - Comparison between the ICH and the ASEAN CTDs resulted in 93% of similarities and 7% differences

# CTD NUMBERING: ASEAN, INDIA, JORDAN, PAHO AND THAILAND Vs. ICH (FDA)

## Comparing All Modules 2-5

	Number of items PAHO Vs ICH (FDA)	Number of items INDIA Vs ICH (FDA)	Number of items JORDAN Vs ICH (FDA)	Number of items ASEAN Vs ICH (FDA)	Number of items THAILAND Vs ICH (FDA)	Total
<b>Different</b>	<b>286</b>	<b>346</b>	<b>313</b>	<b>366</b>	<b>269</b>	<b>1580</b>
<b>Same</b>	<b>96</b>	<b>69</b>	<b>63</b>	<b>0</b>	<b>102</b>	<b>330</b>
<b>Total</b>	<b>382</b>	<b>415</b>	<b>376</b>	<b>366</b>	<b>371</b>	<b>1910</b>
<b>% similarity</b>	<b>25</b>	<b>17</b>	<b>17</b>	<b>0</b>	<b>27</b>	<b>17</b>
<b>% difference</b>	<b>75</b>	<b>83</b>	<b>83</b>	<b>100</b>	<b>73</b>	<b>83</b>

**CTDs in different countries/regions of the world differ even more in terms of numbering, particularly the ASEAN CTD has a completely different structure and numbering to the ICH CTD**

# PAHO Vs. ICH (FDA) NUMBERING

## Comparing Module by Module

# INDIA Vs. ICH (FDA) NUMBERING

## Comparing Module by Module

# JORDAN Vs. ICH (FDA) NUMBERING

## Comparing Module by Module

# ASEAN Vs. ICH (FDA) NUMBERING

## Comparing Module by Module

**Organization (structure of ASEAN CTD is completely different from ICH CTD**

# THAILAND Vs. ICH (FDA) NUMBERING

## Comparing Module by Module

# Relevance of the difference

- CTDs from different countries/regions differ substantially in contents (77%) except for the ASEAN and ICH CTDs which are quite similar (93%)
- The difference is greater in the numbering system with an average difference of 83 %, and a 100% difference between the ASEAN and the ICH CTD due to their completely different structure
- One may argue that differences in numbering are trivial, while differences in content are important

# Relevance of the difference (2)

- Differences in numbering are more important than it may seem at first sight, since all the information, even if identical has to be organized to fit the exact numbering required by each target country, hence representing a huge workload to regulatory affairs staff for no added value, and leading to delays in vaccine availability
- Strong advocacy by manufacturers and vaccine stakeholders and an effort by regulators towards alignment should enable
  - faster dossier preparation by manufacturers,
  - faster and easier review work by NRAs,
  - Increased work and information sharing opportunities among NRAs (they would all talk in the same language)
  - And lastly but not least, quicker access to medicines in countries, which is the end goal

# Acknowledgements

**Working Group Members:** Mary Allin (Pfizer), Abdulaziz M.M Almotiri (Arabio), Paula Barbosa (IFPMA), Nirav Amitkumar Chokshi (Zydus Cadila), Monique Collaço de Moraes Stávale (Bio-Manguinhos), Samir Desai (Zydus Cadila), Shubhangi Ghadge (Serum Institute of India), Tarek Ibrahim (Arabio), Seon Gyeong Jeong (LG Chem).
