

From Temptime to ZEBRA

- 1) Worldwide leader in time-temperature indicator technology
- 2) Part of the global health community for nearly 30 years
- 3) Invested in the success of the regional vaccine manufacturing vision

We work with DCVMs to Help Them Succeed

VVMs are applied to vials during fill-finish, so our know-how is across all types of labelling equipment, and we can help with design, technical assistance, and implementation.

How We Help:

- ✓ Worked closely with Institut Paster de Dakar on prequalification of their Yellow Fever vaccine
- ✓ At no cost, shared equipment design for a unique label-on-label machine used by 10+ DCVMs
- ✓ Co-developed a specific label with SII to overcome language and quantity challenges
