

COVIDRIVE

# COVIDRIVE consortium: current partners

- **Public-private partnership**, privately funded leveraging public health capacities, launched in 2021
- **To** monitor brand-specific COVID-19 vaccine effectiveness (VE) in Europe
- Current COVID-19 studies are requested by vaccine companies to fulfill their **EMA regulatory obligations**

<https://covidrive.eu>

COVIDRIVE

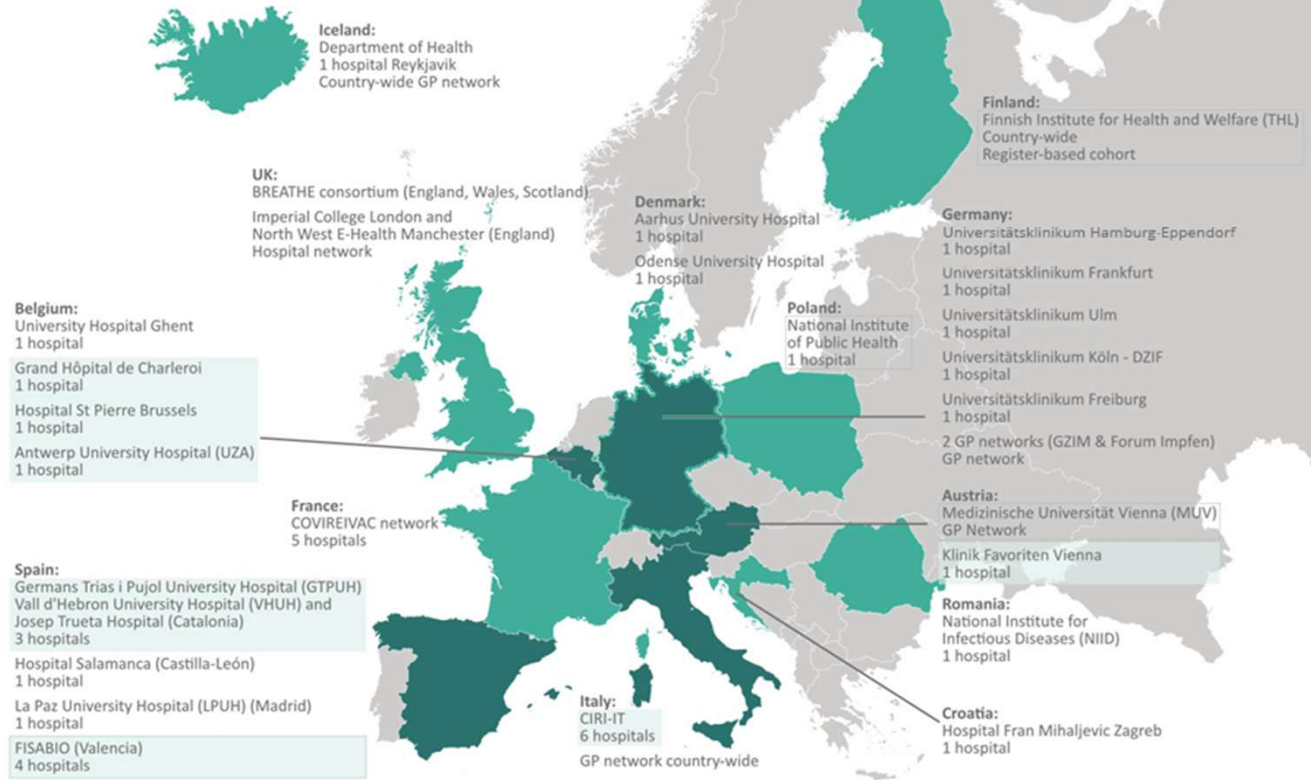

# COVIDRIVE network

55 hospitals  
5 GP networks  
3 population registers

13 European countries  
and expanding....

- COVIDRIVE network
- Countries activated for COVIDRIVE studies
- Study contributors activated for COVIDRIVE studies
- Public Health Institutes

## Why teaming up?

- Bringing together expertise and interests > **knowledge building**
- Fragmented market shares imply **larger studies**
  - Umbrella study with **common data collection**
  - In case-control study designs (most effective to study rare outcomes), **vaccine exposure** is **retrospectively** ascertained → First enrol patients, then check vaccine brand
  - **Cost and healthcare resource-saving**
- Harmonised protocol and proposals to EMA
