# Vaccines and Biologics Training Directory: About

- NIIMBL, with funding from the Bill and Melinda Gates Foundation (BMGF), conducted a needs assessment by interviewing DCVMs and critical stakeholders. The assessment identified the need for a **web-based directory of biopharmaceutical and vaccine manufacturing training and professional development resources, accessible to DCVMs.**
- NIIMBL partnered with the **Developing Countries Vaccine Manufacturers Network (DCVMN), PATH, and Nexight Group** to develop the digital training directory.
- The process:
  1. **Plan:** Worked collaboratively to identify target audiences, key features and functionality, types of offerings to include, level of detail, etc.
  2. **Research:** Identified known existing programs from across the globe; while not exhaustive, the directory includes over 330 programs and partners, with more to come
  3. **Prototype:** Developed a prototype to ensure the tool would be easy to use and meet the needs of the target audiences; vetted the prototype with developing country representatives
  4. **Develop:** Created, tested, and launched the directory, hosted by DCVMN
  5. **Maintain:** It is critical that the tool is kept up to date with the latest trainings. You can help by using the tool's contact form to **submit additional resources or provide feedback.**
