PAHO Regional Revolving Funds

**Revolving
Fund** For Access
to Vaccines

**Strategic
Fund**

**Regional
Revolving
Funds**

The RRFs are **technical cooperation mechanisms** that enable the Americas to equitable access timely quality **vaccines, essential medicines**, and public health supplies.

Through **pooled procurement**, Member States obtain affordable prices and **plan their demand together** to obtain benefits for all plus, **a reliable demand predictability**.

Regional Vaccine Production

In 2020, the PAHO RRF did not prioritize regional manufacturers.

In 2024, the Directing Council approved encouraging regional production.

In 2026, several agreements were made for the supply from regional producers.

Ongoing conversations to include new products and producers

PCV-20 Case: Innovation to achieve sustainability

An abstract background on the left side of the slide. It features a low-poly, geometric globe in shades of blue and orange, set against a dark blue background with a pattern of lighter blue and orange triangles. The globe is positioned in the lower-left quadrant of the slide.

Rapid response to outbreaks and pandemics

Dose reservation of measles and yellow fever

It will be the **first regional pandemic influenza agreement** among middle-income countries in history.

Regional production

Use of **seasonal influenza volumes** to improve pandemic and seasonal conditions

Keys to the Future of the Revolving Funds

- **Ensure access** to quality, timely, and affordable technologies
- **Strengthen supply chains** and preparedness against new threats and high prices
- **Promote regional innovation and production**, building sustainability and resilience
- **Consolidate the RRF as pillars of solidarity and regional cooperation**
