

Healthy Industry Framework (HIF): Tech Transfer & Capacity Building

Protecting
people from
global diseases
since 2000.

An ordered process

Technology transfer and **manufacturing capacity building** requires experienced actors and stakeholders working in an integrated way. **Coordination** and detailed **planning and execution** are key for success. DCVMN's **Healthy Industry Framework** was built for exactly this role.

The ask and the solution, in one sentence:

01

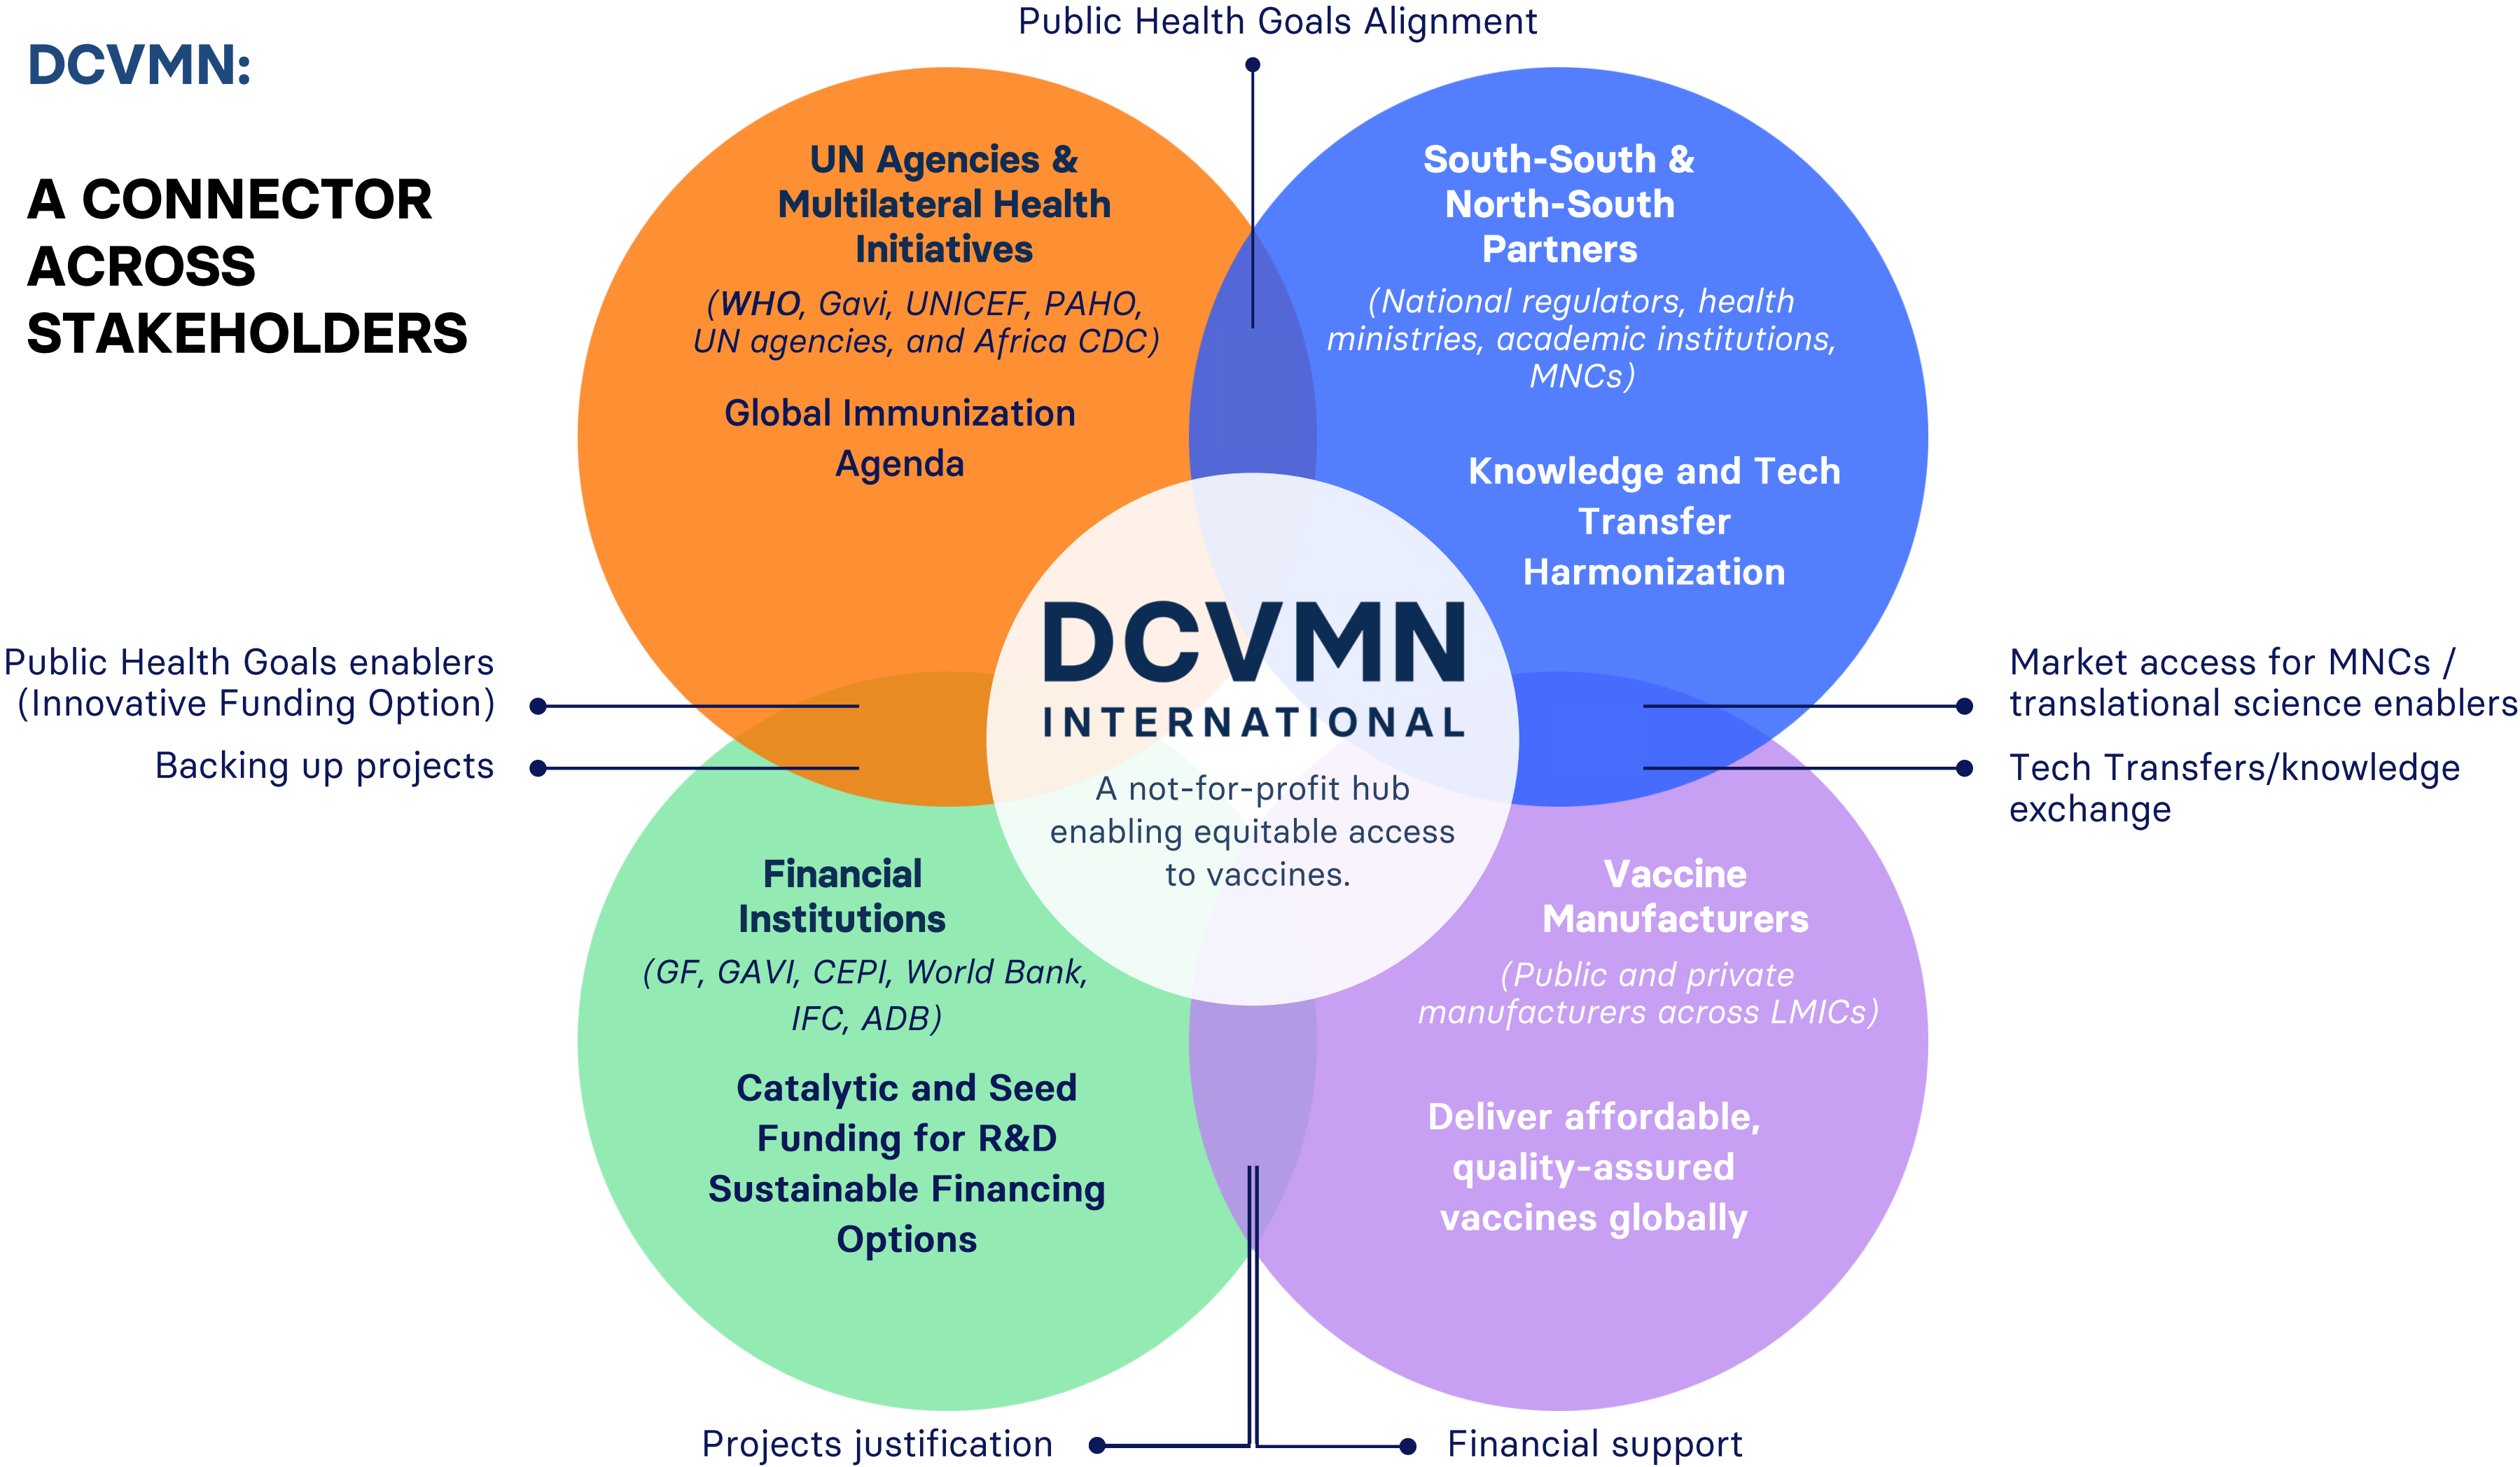

The Ask: Scale technology transfer and capacity building through a trusted, ready-made partner network — not a new parallel structure.

02

The Solution: The Dashboard of Opportunities — DCVMN's existing platform to match and foster priorities with manufacturer capacity, systematically.

DCVMN:

A CONNECTOR
ACROSS
STAKEHOLDERS

Scope of Activities

The Framework defines **five categories of activity** DCVMN can support for members and partners — from spotting an opportunity through to **mobilizing the resources** to fund it.

Five categories, one continuum:

Opportunity Identification

Technology scouting &
market intelligence

Partnership Development

Consortium building &
matchmaking

Opportunity Structuring

Business cases & strategy

Project Acceleration

PMO support & delivery
monitoring

Resource Mobilization

Scouting grants and other
sources of funding

A ONE-STOP SHOP FOR ALL VACCINE MANUFACTURING NEEDS

An intelligent ecosystem to enable efficient, transparent, and mutually beneficial cooperation

Services Include:

The diagram features a central orange circle with text. To its left, under the heading 'Services Include:', are seven items, each preceded by a green circle. To its right, under the heading 'DCVMN Expertise:', are seven items, each preceded by a purple circle. All items are connected to the central circle by thin grey lines.

- Grant and funding opportunities
- Connection to Research Laboratories and Academia
- Tech Transfer opportunities
- Clinical Trials collaboration opportunities
- Training opportunities
- GMP and Quality upgrade support
- IP-related and Regulatory support

DCVMN Expertise:

- Decades of on-ground experience
- Global recognition in advocacy and public health
- Broad knowledge of all key stakeholders
- Extensive technology knowledge
- Market understanding
- Key voice in the main Public Health forums

A comprehensive dashboard where DCVMN members can find all vaccine-related stakeholders to connect for their specific requirements in one place.

How We Operate

DCVMN activities run under **two complementary streams**. **Stream 1 — Ecosystem Building** keeps priorities and opportunities open and pre-competitive; **Stream 2 — Project Acceleration** gives an individual member hands-on execution support once **an opportunity is ready to move**.

Two streams, so priorities stay open while execution stays focused:

Stream 1

Ecosystem Building: Pre-competitive.
Dashboard of Opportunities,
matchmaking, and funder
engagement.

Stream 2

Project Acceleration: Competitive.
Hands-on support for one member
once ready — consortium formation,
proposal support.

Stream 1 examples: Dashboard of Opportunities, strategic dialogues, technology and capacity mapping.

Stream 1 funding: Membership contributions, grants, sponsorships, and strategic partnerships.

Stream 2 examples: Consortium formation, proposal preparation, negotiation support, delivery management.

Stream 2 scope: managed directly between DCVMN International and the requesting member, under DCVMN's governance framework.

Thank you!

We Connect To Protect!
